

Introduction to Algorithms

Module 2.5: Practice Day 01

(GeeksforGeeks and Practice)

Topics:

- 1. Graph Representation
- 2. BFS

Problem Links:

- 1. Keys and rooms LeetCode [Medium]
- 2. Message Route CSES

Practice Problem 1

Question: You will be given an undirected graph as input. Then you will be given a query **Q**. For each query, you will be given source **S** and destination **D**. You need to print the shortest distance between **S** and **D**. If there is no path from **S** to **D**, print **-1**.

Sample Input	Sample Output
6 7	2
0 1 0 2	3
12	3
0 3 4 2	2
3 5	2
4 3 6	0
0 5	
15 25	
2 3	
1 4 0 0	
7 5	-1
0 1	· -1
0 2 4 5	· -1
4 6	•
57	
0 4	
5 1 1 3	
13	

Practice Problem 2

Question: You will be given an undirected graph which will be connected as input. Then you will be given a level **L**. You need to print the node values at level L in descending order. The source will be 0 always.

Sample Input	Sample Output
3 2 0 1 0 2 1	2 1
67 01 02 12 03 42 35 43	3 2 1
6 7 0 1 0 2 1 2 0 3 4 2 3 5 4 3 2	5 4

Practice Problem 3

Question: You will be given an undirected graph as input. Then you will be given a node **N**. You need to print the number of nodes that are directly connected to the node N.

Sample Input	Sample Output
6 5 0 1 0 2 0 3 2 3 4 5 2	2
6 5 0 1 0 2 0 3 2 3 4 5 0	3
7 7 0 1 1 2 2 3 1 3 4 0 0 5 5 6 1	3
